

Anderlecht Recypark - Wood expertise

Anderlecht (BE)

Execution study and expertise

Owner
Bruxelles propreté

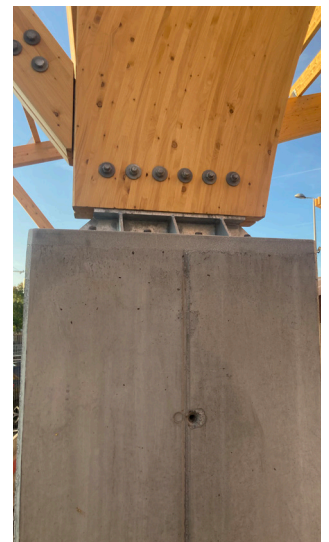

Architect
51N4E

Cost of the works
€ 8,11 M excl. vat of wich
728 000 € for the hall

Studies
2022 - 2023

Execution
2023

ST RV

The **Recypark** project in **Anderlecht** is a fine example of circularity. After buying a horse shed near Bierset, the owner decided to carefully dismantle it and reuse the wooden structure.

Bureau greisch has been contacted to take responsibility for the stability of the reused elements. To this end, we checked the condition of the dismantled timber frames, took part in a series of tests, drew up calculation notes justifying the stability of the re-used arches, and recommended screw reinforcements.

The Recypark aims to create a mixed space between a traditional container park integrated into the urban environment and a skate park.
